Genealogy Blogs,

- [DNAeXplained](#) (Roberta Estes)
- [Your Genetic Genealogist](#) (CeCe Moore)
- [The Genetic Genealogist](#) (Blaine Bettinger)
- [Kitty Cooper's Blog](#) (Kitty Cooper) – there are also some great chromosome mapping tools on the Tools tab, and a comprehensive GEDmatch Utilities Guide on the Downloads tab
- [Cruwys News](#) (Debbie Kennett): Covers topics of interest such as DNA testing and personal genomics, as well as Debbie's Cruwys/Cruse one-name study. This is one of the few blogs covering genetic genealogy topics from the British perspective (I'm a Brit living in California and 100% of my known ancestors were from Great Britain).

Reunion10 for the Mac

August 2014

- [DNA and Family History Research](#) (Maurice Gleeson) – Maurice is a great speaker, so don't miss the link to his [Presentations and Downloads](#)

Mailing lists,

- [DNA-NEWBIE](#) (Yahoo! Group)
- [GENEALOGY-DNA](#) (Rootsweb Group)
- [Autosomal-DNA](#) (Rootsweb Group)
- [AdoptionDNA_Tools](#) (Yahoo! Group)
- [DNAAdoption](#) (Yahoo! Group)
- [UnknownFatherDNAGroup](#) (Yahoo! Group)

The lists involved with adoption, etc. are still really useful to all genetic genealogists, as the DNA tools used to identify family members by those who don't know their biological parents are fundamentally the same as those that help the rest of us find previously unknown relatives.

Native American Lineage

Roberta Estes. DNA-explained.com. Paper published, [Journal of Genetic Genealogy](#) (Vol. 6 #1) in the fall of 2010, titled [Revealing American Indian and Minority Heritage Using Y-line, Mitochondrial, Autosomal and X-Chromosomal Testing Data Combined with Pedigree Analysis](#). Analyzed X chromosome and what it told her about where her Native and African inheritance came from.
